Definitions, Reconciliations and Uses of Non-GAAP Financial Measures

The following non-GAAP measures are used in this release:

Media margin is defined as that portion of gross profit (exclusive of depreciation and amortization) reflecting variable costs paid for media and related expenses and excluding non-media cost of revenue. Gross profit (exclusive of depreciation and amortization) represents revenue minus cost of revenue (exclusive of depreciation and amortization). Media margin is also presented as a percentage of revenue.

Adjusted EBITDA is defined as net income (loss), excluding (1) income taxes, (2) interest expense, net, (3) depreciation and amortization, (4) share-based compensation expense, (5) loss on early extinguishment of debt, (6) accrued compensation expense for Put/Call Consideration, (7) goodwill impairment, (8) write-off of intangible assets, (9) acquisition-related costs, (10) restructuring and other severance costs, and (11) certain litigation and other related costs.

Adjusted net income is defined as net income (loss) excluding (1) Share-based compensation expense, (2) loss on early extinguishment of debt, (3) accrued compensation expense for Put/Call Consideration, (4) goodwill impairment, (5) write-off of intangible assets, (6) acquisition-related costs, (7) restructuring and other severance costs, and (8) certain litigation and other related costs. Adjusted net income is also presented on a per share (basic and diluted) basis.

Below is a reconciliation of media margin from gross profit (exclusive of depreciation and amortization), which we believe is the most directly comparable GAAP measure.

	Three Months Ended December 31,					Year Ended December 31,

(1) Represents the portion of cost of revenue (exclusive of depreciation and amortization) not attributable to variable costs paid for media and related expenses.

Below is a reconciliation of adjusted EBITDA from net income (loss), which we believe is the most directly comparable GAAP measure.

We present media margin, adjusted EBITDA and adjusted net income as supplemental measures of our financial and operating performance because we believe they provide useful information to investors. More specifically:

Media margin, as defined above, is a measure of the efficiency of the Company's operating model. We use media margin and the related measure of media margin as a percentage of revenue as primary metrics to measure the financial return on our media and related costs, specifically to measure the degree by which the revenue generated from our digital marketing services exceeds the cost to attract the consumers to whom offers are made through our services. Media margin is used extensively by our management to manage our operating performance, including evaluating operational performance against budgeted media margin and understanding the efficiency of our media and related expenditures. We also use media margin for performance evaluations and compensation decisions regarding certain personnel.

Adjusted EBITDA, as defined above, is another primary metric by which we evaluate the operating performance of our business, on which certain operating expenditures and internal budgets are based and by which, in addition to media margin and other factors, our senior management is compensated. The first three adjustments represent the conventional definition of EBITDA, and the remaining adjustments are items recognized and recorded under GAAP in particular periods but might be viewed as not necessarily coinciding with the underlying business operations for the periods in which they are so recognized and recorded. These adjustments include certain litigation and other related costs associated with legal matters outside the ordinary course of business, including costs and accruals related to the NY AG and FTC matters. Items are considered one-time in nature if they are non-recurring, infrequent or unusual and have not occurred in the past two years, in accordance with SEC rules. There were no adjustments for one-time items in the periods presented.

Adjusted net income, as defined above, and the related measure of adjusted net income per share exclude certain items that are recognized and recorded under GAAP in particular periods but might be viewed as not necessarily coinciding with the underlying business operations for the periods in which they are so recognized and recorded. We believe adjusted net income affords investors a different view of the overall financial performance of the Company than adjusted EBITDA and the GAAP measure of net (loss) income.

Media margin, adjusted EBITDA, adjusted net income and adjusted net income per share are non-GAAP financial measures with certain limitations regarding their usefulness. They do not reflect our financial results in accordance with GAAP, as they do not include the impact of certain expenses that are reflected in our condensed consolidated statements of operations. Accordingly, these metrics are not indicative of our overall results or indicators of past or future financial performance. Further, they are not financial measures of profitability and are neither intended to be used as a proxy for the profitability of our business nor to imply profitability. The way we measure media margin, adjusted EBITDA and adjusted net income may not be comparable to similarly titled measures presented by other companies and may not be identical to corresponding measures used in our various agreements.
